

Parts of a function

By the end
of this
lesson, you
should be
able to...

1. Understand how to create and invoke a function
2. Know the vocabulary for different parts of a function
3. Understand what the return keyword does

Think / Pair / Share

1. Grab a small whiteboard. You have 2 minutes to answer the question to the right.
2. Then, you have 2 minutes to share your answers with your partner.
3. After that, we will take 2 minutes to talk about your answers with the whole class.

Correct the code!

```
addTen {  
  console.log('I am inside!');  
  return number * 10;  
}  
  
addTen(5);
```

Parts of a function

function keyword

function name

parameter

argument

return value

body

return statement

function invocation operator

```
function addTen(number) {  
    console.log('Inside!')  
    return number + 10;  
}
```

```
addTen(5);
```

```
> 15
```

Parts of a function

function keyword

function name

parameter

argument

return value

body

return statement

function invocation operator

```
function addTen(number) {  
    console.log('Inside!')  
    return number + 10;  
}
```

```
addTen(5);
```

```
> 15
```

Parts of a function

function keyword

function name

parameter

argument

return value

body

return statement

function invocation operator

```
function addTen(number) {  
  console.log('Inside!')  
  return number + 10;  
}
```

```
addTen(5);
```

```
> 15
```

Parts of a function

function keyword

function addTen(number) {  
  console.log('Inside!')  
  return number + 10;  
}
```

```
addTen(5);
```

```
> 15
```

REVIEW TIME

1. How do you invoke a function?
2. What is the return keyword and what does it do?
3. What happens when you do the following?

```
function addTen(number) {  
    console.log(number + 10);  
}  
  
console.log(addTen(5));
```
